

ASSOCIATE OF APPLIED SCIENCE DEGREE (AAS)

This degree provides students with the necessary education and skills required by today's Network Security specialists. Instruction includes courses on server/client centric security issues as well as router/switch centric security issues. It provides students with a wide array of training in various functional areas related to network security. Completion of this course of study prepares students for successful completion of a number of industry certification exams; such as CompTia Security+, Cisco CCNA: Security, and others.

STUDENT LEARNING OUTCOMES - Graduates of this program will have the opportunity to:

- Demonstrate computer hardware/software knowledge and skills.
- Be able to develop basic organization security policies.
- Demonstrate use of networking tools and devices as applies to detecting and mitigating security attacks.
- Demonstrate network security management skills.
- Demonstrate basic project management skills.

Students may elect to graduate using the degree requirements in effect at the time of matriculation, or when they declared or changed major or the current catalog. If a program is official after a student has matriculated, the student may choose the degree requirements of the new program. In no case may a student use a catalog which is more than six years old at the time of graduation.
