Job Description

Radiation Therapists apply knowledge of human anatomy and physiology, oncology, radiation techniques, treatment planning and dosimetry in their work. Effective communication with patients, health professionals, and the public is essential.

Radiation therapists administer a prescribed course of radiation therapy, providing patient care and maintaining treatment records. They evaluate and assess the radiation delivery, the responses of the patient, and ensure the quality of care. Additional duties may include tumor localization, patient follow up and patient education. Competence and compassion must be displayed in the meeting the special needs of oncology patients.

Program Description

The College of Southern Nevada offers a 21-month Associate of Applied Science degree in Radiation Therapy Technology fully accredited by the Northwest Commission on Colleges and Universities. The program prepares the graduate to work with radiation oncologists in delivering daily doses of ionizing radiation to the prescribed tumor volume. Students receive both classroom instruction and supervised clinical experience in cancer centers. Graduates are eligible to sit for the National Exam for the American Registry of Radiologic Technologists Certification in Radiation Therapy.

Career Opportunities

Radiation therapists are employed by health care facilities, including cancer centers and private offices. They may also be employed in education, management, research, and marketing.

Approximate Salary in Nevada

Median Annual Wage..... \$82,790.00
Median Hourly Wage \$39.80
