MATH ADVISING AND PLACEMENT INFORMATION

MATH ADVISING:
The selection of a MATH course depends on your specific degree or program. Confirm which course you need with a Counselor, Advisor, or the Math Department before you register. If you have yet to meet with a Counselor or Advisor, more information can be found at www.csn.edu/counseling.

Any full-time faculty member in the Math Department will also be glad to provide you with further assistance in the selection of the appropriate MATH course. For the faculty contact information, please visit the Math Department’s website at www.csn.edu/math, or call 702.651.4029 or 702.651.7472.

You may also want to consider reviewing the degree sheets found by following the Degree Programs link on CSN’s website at www.csn.edu.

MATH PLACEMENT:
Before you can register for any MATH class, you must first establish a placement level by one of the following:

- Officially transfer college math credits from another institution to CSN.
- Bring (or e-mail) unofficial transcripts to the Math Department at math@csn.edu.
- Provide the Testing Center with sufficient CLEP or AP Calculus Test scores.
- Provide the Testing Center with copies of SAT or ACT scores that are less than two years old.
- Take the ACCUPLACER Math Placement Test at any of the CSN Testing Centers.
- Once a placement level is established, you may attempt to raise that level by taking one or more of the Math Diagnostic Tests available in the Testing Centers.

More information on the Placement and Diagnostic Tests, including practice questions with detailed solutions, and cut-off scores for different courses, can be found by following the corresponding link available at www.csn.edu/math.

Placement levels established through the SAT/ACT scores, ACCUPLACER or Math Diagnostic Tests are good for two years.

If your placement level is below MATH 95, you will be allowed to register for MATH 93, MATH 104, MATH 116, or the MATH PREP courses offered through the CSN Workforce Program.

- For more information on the MATH PREP courses, please visit www.csn.edu/workforce.
- For more information about specific MATH courses, please visit www.csn.edu/math.
