Every year, CSN’s chapter of Phi Theta Kappa, Alpha Xi Beta, conducts a year-long scholarly project based on Phi Theta Kappa’s honors study topic. The project involves scholarly research, identifying a problem, and an action phase to address the problem.

**Research**
Factory farming

**Focus**
How factory farming affects ground, ocean, and rain water

**Action**
An awareness campaign involving a Professor of Environmental Science presentation and training to Phi Theta Kappa members, classroom presentations to CSN students, and a CSN poster fair.
